Charger List

1. The charger list shows every charger bound to the account and its status.
2. When the charger is on-line, click the red area as the figure shows to enter the charging page. And when the charger is off-line, you cannot enter the charging page.
3. Long press the red area at any time to enter the User List page, you can bound your charger and unbind other users or the current charger by clicking.
4. If you are the administrator of a charger and unbind it, all users bound to this charger will be unbound at the same time.
5. For the charger with screen, a QR code will display on the screen when the charger's connector is plug into an EV, click the blue area on the APP to open the camera, and scan the QR code and bind it. For the charger without screen, there is a QR code on the enclose of charger, click the blue area on the APP to open the camera, and scan the QR code and bind it.
6. If you use this function for the first time, the APP will remind you to grant camera permission. If you refuse authorization, you will not be able to use this function. If you still need this function, provide camera authorization to the APP first in the settings of your mobile phone.
7. The first account for binding a charger is the main account of the charger by default. The management account has the approval authority of new binding users, and can unbind existing users.
8. The account newly bound to a charger is a sub account, if the charger has been bound with a main account. An applicant message will submit to the APP of the main account, when the sub account is binding to the charger. The binding operation will be completed only after the main account approves it.
9. It will take 24 hours to scan the QR code again to submit the application, if the main account does not process this message in time, or if the main account refuses approve.
